Art Unit: 1624

Applicant's amendments and remarks filed 5/21/04 have been received and reviewed.

Claims 34 is still pending in this application.

Claim Rejections - 35 USC § 112

Claims 34 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

i) The groups "carboxylic acid or its amides" and "sulfonic acid" are present in the claim. It appears that Applicant intention is a "carboxyl" group. The "amides" are unclear. Is the group carboxamido intended, that is $\text{NH}_2\text{-C(O)-}$? Similar correction of "sulfonic acid" to the radical "sulfo" is suggested.

ii) The term "its" in page 2, line 17 is superfluous.

Claim 34 is rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for a pharmaceutically acceptable salt, does not reasonably provide enablement for solvates or polymorphs of the compound of formula (IIIe). The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make the invention commensurate in scope with these claims. Applicants have not shown how one skilled in the art can arrive at a given solvate. None of the compounds made are crystallized out as solvates. Arriving at a given solvate is not routine experimentation because it is unpredictable. One cannot make any solvate of a compound.

Regarding the polymorphic form, crystal structures are not predictable and arriving at every possible crystal structure is nearly impossible. The difficulties of arriving at a single

polymorph are well documented. Applicants have not provided any data or taught one skilled in the art how to arrive at any polymorph.

Claim Rejections - 35 USC § 102

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim 34 is rejected under 35 U.S.C. 102(b) as being anticipated by Vanderhaeghe et al. (Journal of Organic Chemistry (1961), 26, 3827-3831). The claim reads on compound X on page 3828 of the reference (see also page 3831, second column, third paragraph).
